Juniper

JN0-413

Cloud, Specialist (JNCIS-Cloud)

<https://killexams.com/pass4sure/exam-detail/JN0-413>

Question: 235

You have configured an SR-IOV interface on a virtual host machine in your Contrail network environment. You discover that analytics data is not being recorded for traffic to the customer's VM that uses the SR-IOV interface.

Which two statements are true in this scenario? (Choose two.)

- A. You cannot perform analytics on the SR-IOV interface traffic.
- B. The SR-IOV interface must be re-added to the analytics engine.
- C. The data of packets going to the VM does not go through the vRouter on the host.
- D. You must use the tap interface on the Contrail vRouter to collect SR-IOV analytics data.

Answer: A,D

Question: 236

What are two Keystone endpoint types? (Choose two.)

- A. root
- B. admin
- C. rbac
- D. public

Answer: A,B,D

Explanation:

<https://linuxacademy.com/blog/linux/understanding-keystone-endpoints/>

Question: 237

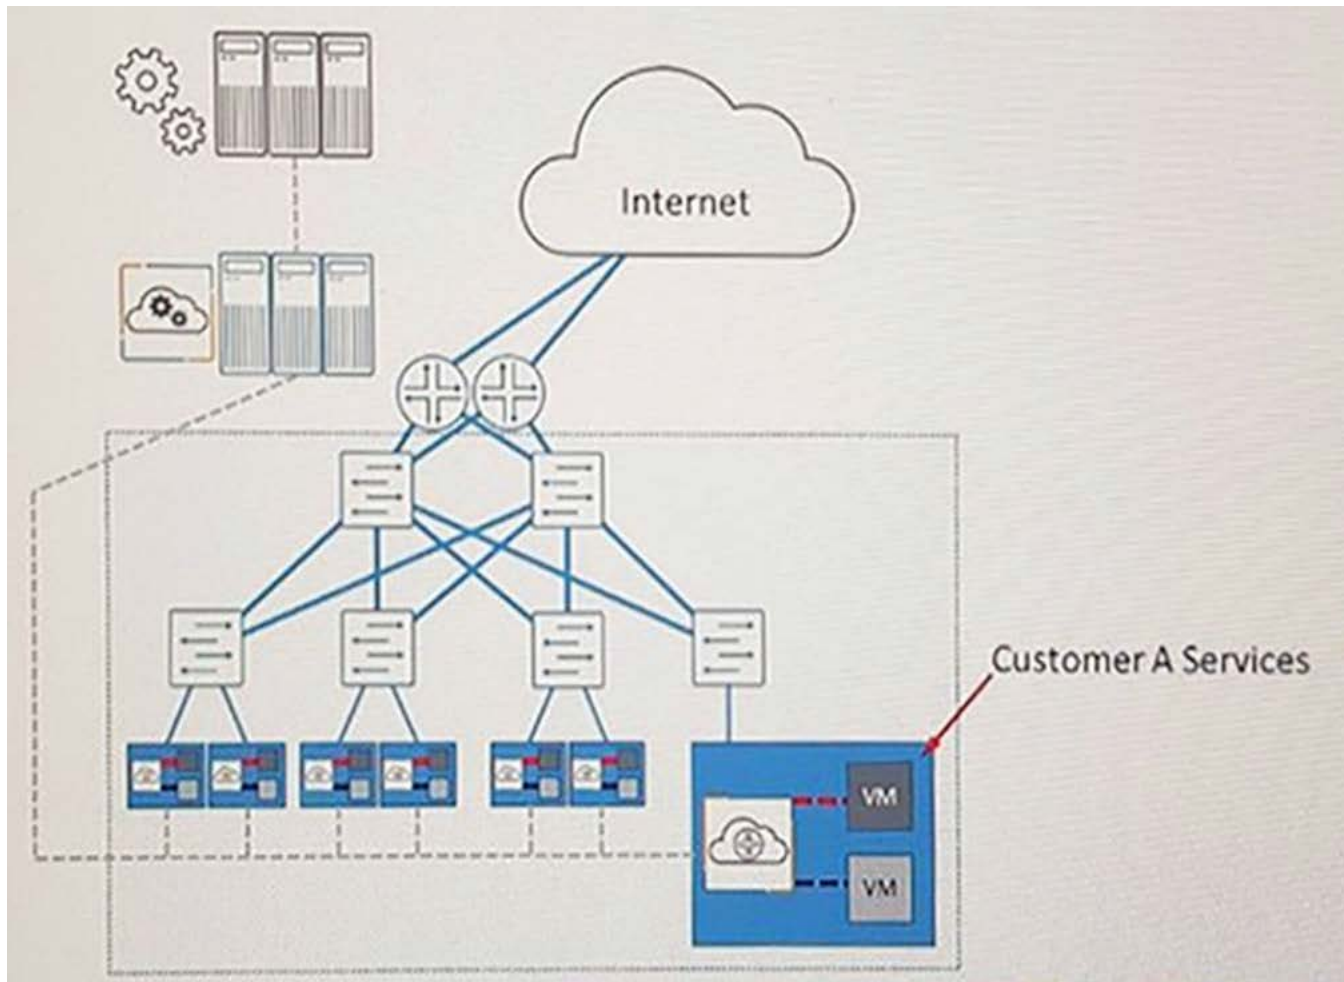

What is the role of an orchestration platform in a cloud networking environment?

- A. It controls and monitors the network underlay infrastructure.
- B. It controls pools of compute, storage, and networking resources.
- C. It configures and monitors tunnels between physical hosts.
- D. It configures and monitors tunnels between virtual hosts.

Answer: B

Question: 238

Refer to the exhibit.

You have a Contrail providing cloud services to Customer A. Customer A wants to add a packet capture service to their network to analyze traffic flowing to and from the Internet.

Referring to the exhibit, which statement is true?

- A. The packet sniffing service must be performed on the edge routers facing the Internet.
- B. The packet sniffing service must be enabled on the vRouter directly attached to the customer's V
- C. The packet sniffing service can be implemented on any physical host in the cloud environment.
- D. The packet sniffing service can be implemented on any switch within the underlay fabric.

Answer: B

Question: 239

Which two OpenStack projects contain networking components? (Choose two.)

- A. Keystone
- B. Magnum
- C. Nova
- D. Neutron

Answer: A,B,D

Question: 240

Which statement is true regarding Virtual Network Functions (VNF)?

- A. A VNF is implemented with virtual platforms.
- B. A VNF requires an SDN controller for implementation.
- C. A VNF is implemented with physical hardware platforms.
- D. A VNF requires an SDN orchestrator for implementation.

Answer: A

Question: 241

You are required to implement a Contrail service that will automatically increase network resources for that service when under high traffic loads, and reduce network resources for that service under low traffic loads.

Which configuration steps will accomplish this task?

- A. Configure Heat to monitor the CPU threshold of services VMs, and configure a Heat auto-scaling policy to adjust the VM resources allocated to the service.
- B. Configure Ceilometer to monitor the CPU threshold of services VMs, and configure a Ceilometer auto-scaling policy to adjust the VM resources allocated to the service.
- C. Configure Heat to monitor the CPU threshold of services VMs, and configure a Ceilometer auto-scaling policy to adjust the VM resources based on alarms generated by Heat.
- D. Configure Ceilometer to monitor the CPU threshold of services VMs, and configure a Heat auto-scaling policy to adjust VM resources based on the alarms generated by Ceilometer

Answer: D

Question: 242

You want to deploy an application to the cloud so that the application instances can be dynamically mirrored. You want to manage only the application, leaving all other management to the cloud provider.

Which type of cloud service should you choose in this situation?

- A. IaaS
- B. PaaS
- C. DBaaS
- D. SaaS

Answer: B

Question: 243

Refer to the exhibit.

[DEFAULTS]

if_map_server_ip=10.1.1.252
if_map_server_port=8443
ifmap_username=api-server
ifmap_password=api-server
Cassandra_server_list=10.1.1.252:9160
Listen_ip_addr=0.0.0.0
Listen_port=8082
auth=keystone
multi_tenancy=False
log_file=/var/log/contrail/api.log
disc_server_ip=10.1.1.252
disc_server_port=5998
zk_server_ip=10.1.1.252:2181
redis_server_ip=None

[SECURITY]

use_serts=False
keyfile=/etc/contrail/ssl/private_keys/apiserver_key.pem
ca_certs=/etc/contrail/ssl/certs/ca.pem

[KEYSTONE]

auth_host=10.1.1.2
auth_protocol=http
auth_user=admin
auth_password=1a0137e30d2845ee
auth_token=9a6acb8cc329009201df6
auth_tenant_name=admin

Referring to the exhibit, what does the IP address 10.1.1.2 refer to in the api_server.conf file in Contrail?

- A. The physical server IP address
- B. The OpenStack controller IP address
- C. The Server Web UI IP address

D. The Contrail IP address

Answer: B

Question: 244

You have deployed a load-balancing service for a customer in your Contrail cloud networking environment for their data cache system. Due to the network capacity requirements, the caching servers must be migrated to a different rack of equipment within the data center.

Which two statements are true in this scenario? (Choose two.)

- A. A new load-balancing service will be provisioned by the orchestrator prior to moving the caching servers.
- B. The orchestration platform can remap the traffic through the existing load-balancing service once the caching servers are moved.
- C. The load-balancing service must be decommissioned and re-provisioned once the caching servers are moved.
- D. The load-balancing service can be migrated to the vRouters where the caching servers are located.

Answer: A,B,D

Question: 245

You are implementing an OpenStack environment and need to install the Glance service on the control node.

Which two actions must take place to successfully complete this action? (Choose two.)

- A. Create the API endpoints in Keystone.
- B. Create a new availability zone for Glance.
- C. Create the Glance service credentials.
- D. Create local storage capacity for Glance images.

Answer: A,C

Explanation:

<https://docs.openstack.org/mitaka/install-guide-ubuntu/glance-install.html>

Question: 246

You are using OpenStack as the orchestrator for your data center. You need to instantiate several instances of a webserver. There is a requirement that each webserver VM must have six VCPUs and 32 GB of RAM.

Where in OpenStack's Web user interface would you set up these resources?

- A. Project>Compute>Instances
- B. Orchestration>Stacks
- C. Project>Compute>Images
- D. Admin>System>Flavors

Answer: D

Explanation:

<https://docs.openstack.org/horizon/latest/admin/manage-flavors.html>

Question: 247

You are asked to create a Contrail service instance between two virtual networks. The left virtual network is a private virtual network. The routes from the left virtual network VRF should not be leaked into the right virtual network VRF.

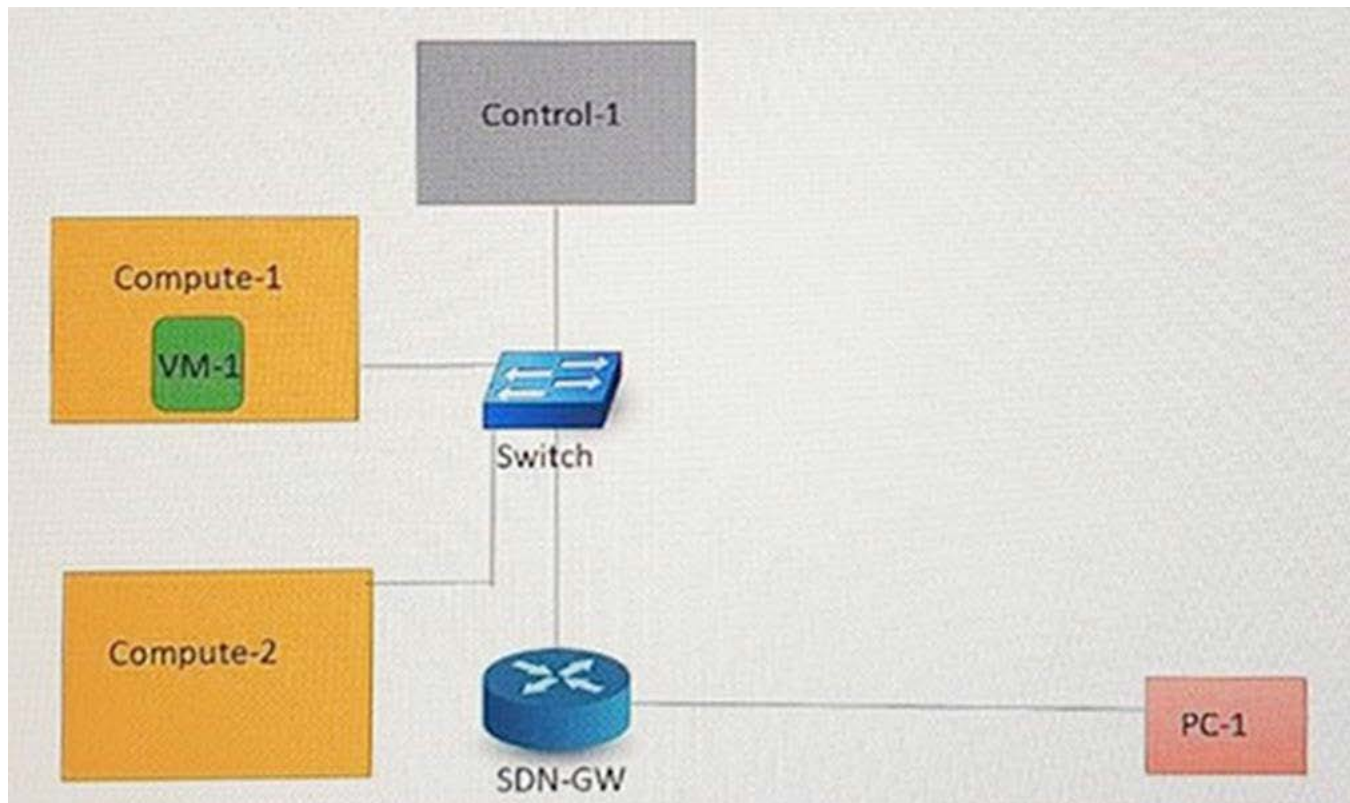

Which Contrail service instance type would you choose in this scenario?

- A. In-network private
- B. In-network NAT
- C. In-Network
- D. Transparent

Answer: B

Question: 248

Refer to the exhibit.

Virtual machine VM-1 is spawned on a compute node Compute-1. VM-1 is not able to ping PC-1, which is located outside of the SDN cloud. You want to run packet captures to trace the packet initiated by VM-1 towards PC-1.

Referring to the exhibit, which three interfaces would you use to accomplish this task? (Choose three.)

- A. The SDN-GW interface facing the SDN cloud
- B. The Control-1 data interface
- C. The Compute-1 data interface
- D. The VM-1 tap interface
- E. The Compute-2 data interface

Answer: A,C,D

Question: 249

What is needed to move compute resources between cloud environment?

- A. Orchestration software
- B. Data compression software
- C. Firewall software
- D. Load-balancing software

Answer: A

Question: 250

Creating a Contrail service chain requires the configuration of which three elements? (Choose three).

- A. Service Policy
- B. Service template
- C. Service object
- D. Service network
- E. Service instance

Answer: A,B,E

Explanation:

https://www.juniper.net/techpubs/en_US/contrail3.1/topics/task/configuration/service-chaining-vnc.html

Question: 251

Which command displays routes in a vRouter VRF?

- A. rt
- B. show route
- C. show route table vrf-name
- D. route print

Answer: A

Explanation:

https://www.juniper.net/documentation/en_US/contrail2.1/topics/task/configuration/vrouter-cli-utilities-vnc.html

Question: 252

Which three load-balancing algorithms are supported by Contrail's LBaaS feature? (Choose three.)

- A. Destination port
- B. Source IP
- C. Weighted round-robin
- D. Least connections
- E. ECMP

Answer: A,B,C,D

Explanation:

https://www.juniper.net/documentation/en_US/contrail3.1/topics/task/configuration/load-balance-as-service-vnc.html

Killexams.com is a leading online platform specializing in high-quality certification exam preparation. Offering a robust suite of tools, including MCQs, practice tests, and advanced test engines, Killexams.com empowers candidates to excel in their certification exams. Discover the key features that make Killexams.com the go-to choice for exam success.

Exam Questions:

Killexams.com provides exam questions that are experienced in test centers. These questions are updated regularly to ensure they are up-to-date and relevant to the latest exam syllabus. By studying these questions, candidates can familiarize themselves with the content and format of the real exam.

Exam MCQs:

Killexams.com offers exam MCQs in PDF format. These questions contain a comprehensive collection of questions and answers that cover the exam topics. By using these MCQs, candidate can enhance their knowledge and improve their chances of success in the certification exam.

Practice Test:

Killexams.com provides practice test through their desktop test engine and online test engine. These practice tests simulate the real exam environment and help candidates assess their readiness for the actual exam. The practice test cover a wide range of questions and enable candidates to identify their strengths and weaknesses.

Guaranteed Success:

Killexams.com offers a success guarantee with the exam MCQs. Killexams claim that by using this materials, candidates will pass their exams on the first attempt or they will get refund for the purchase price. This guarantee provides assurance and confidence to individuals preparing for certification exam.

Updated Contents:

Killexams.com regularly updates its question bank of MCQs to ensure that they are current and reflect the latest changes in the exam syllabus. This helps candidates stay up-to-date with the exam content and increases their chances of success.
