Scrum

Scrum-PSD

Professional Scrum Developer (PSD)

<https://killexams.com/pass4sure/exam-detail/Scrum-PSD>

Question: 33

Who writes tests in a scrum team?

- A. Most junior developer
- B. Product owner
- C. QA specialists
- D. Scrum master
- E. The tester
- F. Developers

Answer: F

Explanation:

Tests are part of the development, and the development is done by the developers. There are no specific roles in scrum, even though members of the scrum team can have their own expertise.

Question: 34

The developers should have all the skills needed to:

- A. Do all the work except for deployment
- B. Complete the work in the within the foreseen time and costs
- C. Create a potentially releasable increment from the product backlog items

Answer: C

Explanation:

Developers are cross-functional, this means that they have all the skills necessary to create value each sprint.

Question: 35

At the 10th sprint review, the stakeholders are disappointed and angry. They have determined that the product or system being built both will not meet their needs and will cost more than they are willing to spend.

What factors may have led to this? (choose three)

- A. Changes to the project plan were not adequately documented and shared
- B. The product owner has not been keeping the stakeholders aware of the progress of the project
- C. The project management office has not been engaged adequately
- D. The scrum master has not ensured that the project is transparent
- E. The stakeholders were not allowed to enter the development area
- F. The stakeholders haven't been using sprint reviews to inspect and evaluate progress

Answer: B,D,F

Explanation:

there is no project plan, the presence of stakeholders in the development area is probably not helping and there is no project management. Transparency would avoid the surprise for the stakeholders. If the PO didn't frequently update them, this can also lead to surprise and disappointment. If the stakeholders couldn't attend the sprint review they would also not be up to date and missing out on an opportunity to inspect and adapt.

Question: 36

What is a mock object?

- A. A mock helps you create a build script
- B. Mocks, stubs, dummies, fakes and shims are all the same
- C. A mock is a way to initialize the database for testing
- D. A test object that mimics the behavior of a dependency in the system under test

Answer: D

Question: 37

If multiple teams are working on the same product, each team should have its own product owner

- A. False
- B. True

Answer: A

Explanation:

One product owner per product backlog, one product backlog per product

Question: 38

The goal of the daily scrum is inspecting the progress toward the sprint goal and producing an actionable plan for the next day of work

- A. False
- B. True

Answer: B

Explanation:

If you are not sure, review the daily scrum section in the scrum guide.

Question: 39

What is static analysis?

- A. Analysis performed on software at runtime

- B. A tool that inspects the correctness of static keyword usage
- C. Work performed by the business analyst
- D. Analysis performed on code

Answer: D

Explanation:

Static analysis is performed on code (and not a running program or build).

Question: 40

What is a merge in a version control system?

- A. Identifying a particular codebase as ready for distribution
- B. Combining two or more versions of code into a single codebase
- C. Copying a portion of a codebase to isolate it from the original codebase
- D. Two or more developers working together to ensure proper coding and configuration management

Answer: B

Explanation:

Merging means combining two different versions of the code into one version.

Killexams.com is a leading online platform specializing in high-quality certification exam preparation. Offering a robust suite of tools, including MCQs, practice tests, and advanced test engines, Killexams.com empowers candidates to excel in their certification exams. Discover the key features that make Killexams.com the go-to choice for exam success.

Exam Questions:

Killexams.com provides exam questions that are experienced in test centers. These questions are updated regularly to ensure they are up-to-date and relevant to the latest exam syllabus. By studying these questions, candidates can familiarize themselves with the content and format of the real exam.

Exam MCQs:

Killexams.com offers exam MCQs in PDF format. These questions contain a comprehensive collection of questions and answers that cover the exam topics. By using these MCQs, candidate can enhance their knowledge and improve their chances of success in the certification exam.

Practice Test:

Killexams.com provides practice test through their desktop test engine and online test engine. These practice tests simulate the real exam environment and help candidates assess their readiness for the actual exam. The practice test cover a wide range of questions and enable candidates to identify their strengths and weaknesses.

Guaranteed Success:

Killexams.com offers a success guarantee with the exam MCQs. Killexams claim that by using this materials, candidates will pass their exams on the first attempt or they will get refund for the purchase price. This guarantee provides assurance and confidence to individuals preparing for certification exam.

Updated Contents:

Killexams.com regularly updates its question bank of MCQs to ensure that they are current and reflect the latest changes in the exam syllabus. This helps candidates stay up-to-date with the exam content and increases their chances of success.
