Question: 22

Which of the following is NOT an action to take in order to tune a new ESB profile server for high performance?

- A. Synapse configuration level settings
- B. JVM-level settings
- C. WS02 Carbon platform level settings
- D. OS-level settings

Answer: A

Question: 23

When building an integration scenario with the ESB profile, you CANNOT use:

- A. JavaScript for processing messages at a given message sequence.
- B. Synapse configuration language.
- C. WS02 EIttooling.
- D. Java code to build the entire message processing logic.

Answer: D

Question: 24

Which statement about the Entitlement mediator is true?

- A. Entitlement mediator intercepts requests and evaluates the actions performed by the user against an extensible Access Control MarkupLanguage (XACML) policy.
- B. All of the above.
- C. When configuring the mediator, you specify which sequence to execute depending on the Entitlement mediator result.
- D. Entitlement mediator can only work with WS02 Identity Server as the PolicyDecision Point.

Answer: A

Question: 25

Select the CORRECT statement about setting parameters for class mediators.

- A. Both statement b and c are correct.
- B. It is not possible to set parameters for custom mediators.
- C. Custom mediator's parameters should be declared as public fields in mediator code. For instance: public String foo, bar;
- D. Synapse properties can be used to pass values to mediator arguments.
For instance:

```
<class name="org.wso2.custom.HelloClassMediator">
<property name=MfooM value="10"/>
<property name=Mbar
value="5"/>
</class>
```

Answer: D

Question: 26

Select the best extension point of the ESB profile that can be used to secure an API created inside the ESB profile with access restricted to limited user roles.

- A. Use an Axis2 handler
- B. Write a custom Class mediator
- C. Use an API handler
- D. Use an Axis2 module

Answer: B

Question: 27

Which statement is FALSE about SSL profile support in WS02 EI?

- A. SSL outbound profiles allow different SSL profiles for different backend servers.
- B. Each ssl profile uses the same keystore and truststore.
- C. Inbound SSL profiles allow you to specify different SSL profiles for different IPs of clients
- D. The purpose of SSL profiles is to allow connections to different servers with different certificates and identities.

Answer: B

Question: 28

Which statement is true about EIPs?

- A. EIPs are designed to implement SOA.
- B. EIPs are used by most ESB vendors as a common set of patterns related to integration.
- C. EIP is a standard for all ESBs.
- D. EIPs are not valid for modern integration scenarios.

Answer: C

Question: 29

How do you configure a REST API to handle different mediation logic with different HTTP verbs?

- A. Define a resource for each API, and only allow that HTTP verb for that particular resource.
- B. Each HTTP method can be identified by the transport, and you can configure a sequence for each method at transport configuration logic.
- C. Only define the message filtering switching logic inside a sequence, and each path can handle the specific HTTP verb.
- D. Wrap a given REST API with an inbound so that you can filter out requests based on an HTTP verb.

Answer: A

Question: 30

Which statement is TRUE about error handling in the ESB profile?

- A. The Exception mediator can be used to customize error messages that are sent back to the client.
- B. It is mandatory to associate each sequence and proxy service with a fault sequence.
- C. Within the fault sequence, you can access error details using the EXCEPTION_DETAIL property.
- D. A fault sequence is a collection of mediators just like any other sequence, and it can be associated with another sequence or a proxy service.

Answer: D

Killexams.com is a leading online platform specializing in high-quality certification exam preparation. Offering a robust suite of tools, including MCQs, practice tests, and advanced test engines, Killexams.com empowers candidates to excel in their certification exams. Discover the key features that make Killexams.com the go-to choice for exam success.

Exam Questions:

Killexams.com provides exam questions that are experienced in test centers. These questions are updated regularly to ensure they are up-to-date and relevant to the latest exam syllabus. By studying these questions, candidates can familiarize themselves with the content and format of the real exam.

Exam MCQs:

Killexams.com offers exam MCQs in PDF format. These questions contain a comprehensive collection of questions and answers that cover the exam topics. By using these MCQs, candidate can enhance their knowledge and improve their chances of success in the certification exam.

Practice Test:

Killexams.com provides practice test through their desktop test engine and online test engine. These practice tests simulate the real exam environment and help candidates assess their readiness for the actual exam. The practice test cover a wide range of questions and enable candidates to identify their strengths and weaknesses.

Guaranteed Success:

Killexams.com offers a success guarantee with the exam MCQs. Killexams claim that by using this materials, candidates will pass their exams on the first attempt or they will get refund for the purchase price. This guarantee provides assurance and confidence to individuals preparing for certification exam.

Updated Contents:

Killexams.com regularly updates its question bank of MCQs to ensure that they are current and reflect the latest changes in the exam syllabus. This helps candidates stay up-to-date with the exam content and increases their chances of success.
