Answer: A, C

QUESTION: 45

Which three options are three of the main advantages of the Cisco Unified Access WLAN architecture over the Autonomous access WLAN? (Choose three.)

- A. ability to send only one type of traffic at a time
- B. increased reliability with failover and self-healing mechanisms
- C. faster creation of wireless "islands" for every application in the plant
- D. increased deployment, management, and integration costs
- E. enhanced security services with centralized control and visibility
- F. can be used for roaming within the plant

Answer: B, E, F

QUESTION: 46

Which action can you use multiple SSIDs in the autonomous architecture to accomplish?

- A. Set up maintenance channels only.
- B. Combine traffic from all machines into a single place.
- C. Segment the IACS control traffic from the noncritical wireless traffic.
- D. Increase the amount of interference.

Answer: C

QUESTION: 47

When you consider wireless media for an IACS application, which percentage of traffic should be reserved for HMI and maintenance traffic, such as RSLinx, programming tools, and IT management?

- A. 3%
- B. 60%
- C. 20%
- D. 85%

Answer: C

QUESTION: 48

Which two options are features of the Connected Factory Wireless Autonomous Wireless architecture? (Choose two.)

- A. high scalability
- B. limited coordination of operation between APs
- C. individual management
- D. centralized control
- E. support for high amounts of data traffic

Answer: B, C

QUESTION: 49

In the Cisco Unified architecture, which action by a workgroup bridge that is configured as a mobile station causes the WGB to search for a new parent association and roam to the new parent?

- A. It encounters a poor RSSI.
- B. It gets a low battery notification.
- C. It travels beyond a specified distance.
- D. It confronts a new WLAN.

Answer: A

QUESTION: 50

Which Connected Factory Wireless solution architecture is ideally set up for larger enterprises with a wide range of clients and applications?

- A. Autonomous Access
- B. Workgroup Access
- C. Direct Access
- D. Unified Access
- E. Virtual Access

Answer: D

QUESTION: 51

Which three methods can a client device use to connect to a WLAN? (Choose three.)

- A. integrated wireless adapter
- B. firewall
- C. universal bridge
- D. workgroup bridge
- E. toll bridge
- F. radio

Answer: A, D, F

QUESTION: 52

Which Connected Factory Wireless solution architecture uses stand-alone access to implement WLAN functions of management, control, data transport, and client access?

- A. Workgroup Access
- B. Autonomous Access
- C. Controlled Access
- D. Unified Access
- E. Normal Access

Answer: B
