QUESTION: 45

DRAG DROP

You need to add code at line IM14 to meet the user interface requirement.

How should you complete the relevant code segment? To answer, drag the appropriate code segments to the correct location or locations. Each code segment may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

Answer:

Exhibit

QUESTION:

46 DRAG DROP

You need to meet the storage requirements.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of the answer area and arrange them in the correct order.

Actions

- Install the MySQL package and define database entities.
- Install the SQLite package and define database entities.
- Launch the Visual Studio 2015 command prompt.
- Launch the NuGet Package Manager console.
- Run the **Enable-Migrations** Windows PowerShell cmdlet.
- Use MySQL to create the database.
- Use Entity Framework migrations to create the database.

Answer Area

Navigation arrows: > and <

Answer:

QUESTION: 47

HOTSPOT

You must evaluate the code in CredentialManager.cs.

For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

Answer area

| Statements | Yes | No |
|---|-----------------------|-----------------------|
| The code retrieves credentials for all the users that have run the app. | <input type="radio"/> | <input type="radio"/> |
| The code uses Credential Locker to retrieve user credentials. | <input type="radio"/> | <input type="radio"/> |
| The code displays the user interface to collect user credentials. | <input type="radio"/> | <input type="radio"/> |

Answer:
Exhibit

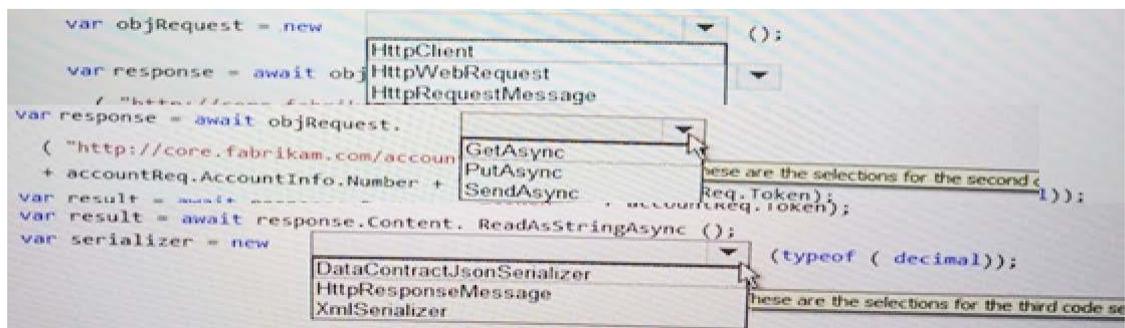

Answer area

| Statements | Yes | No |
|---|----------------------------------|----------------------------------|
| The code retrieves credentials for all the users that have run the app. | <input type="radio"/> | <input checked="" type="radio"/> |
| The code uses Credential Locker to retrieve user credentials. | <input checked="" type="radio"/> | <input type="radio"/> |
| The code displays the user interface to collect user credentials. | <input checked="" type="radio"/> | <input type="radio"/> |

QUESTION: 48

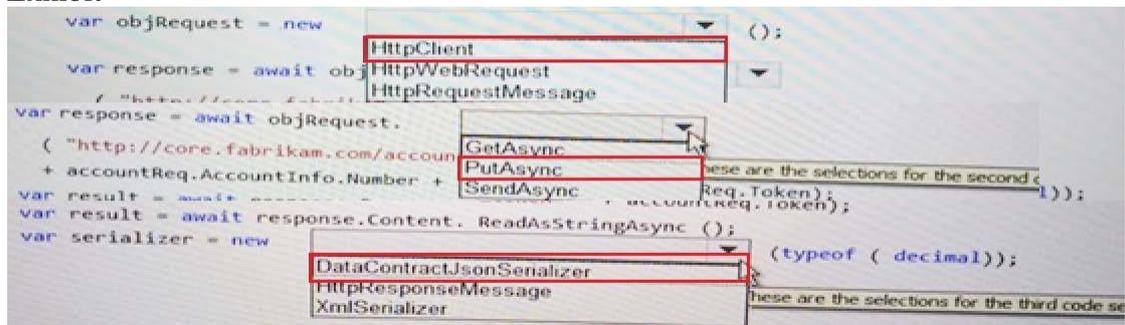

HOTSPOT

You need to insert code at line CP15 to retrieve the account balance for a user. How should you complete the relevant code? To answer, select the appropriate code segment from each list in the answer area.

Answer:

Exhibit

QUESTION: 49

You need to configure networking.

Which two networking technologies should you use? Each correct answer presents a complete solution.

- A. StreamWebSocket class
- B. HttpClient class
- C. Background Transfer API

- D. MessageWebSocket class
- E. Custom WebSocket class

Answer: C, D

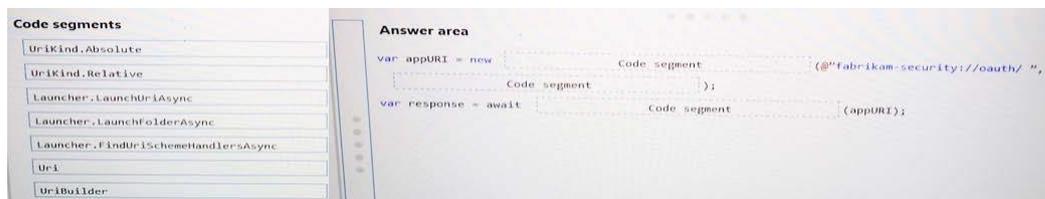

QUESTION: 50

DRAG DROP

You need to launch the authentication app.

How should you complete the relevant code? To answer, drag the appropriate code segments to the correct location or locations. Each code segment may be used once, more than once, or not at all.

You may need to drag the split bar between panes or scroll to view content.

Answer:

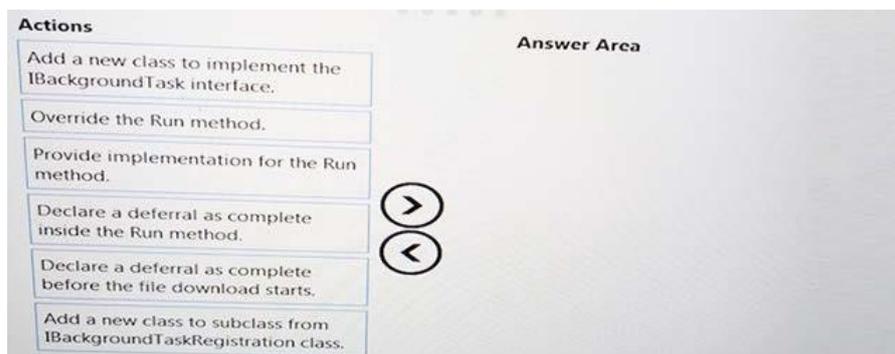

Exhibit

QUESTION: 51

DRAG DROP

You need to download the bank statements and alert the user when the download is complete. Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Answer:

Exhibit

The image shows a screenshot of a software development interface. On the left, there is a panel titled "Actions" containing three items:

- Override the Run method.
- Declare a deferral as complete before the file download starts.
- Add a new class to subclass from IBackgroundTaskRegistration class.

In the center, there are two circular navigation buttons: the top one contains a right-pointing arrow (>) and the bottom one contains a left-pointing arrow (<).

On the right, there is a panel titled "Answer Area" containing three items:

- Add a new class to implement the IBackgroundTask interface.
- Provide implementation for the Run method.
- Declare a deferral as complete inside the Run method.
