Communication Server 1000 Rls.5.0 Applications

<http://killexams.com/pass4sure/exam-detail/920-430>

D. the communication of the messaging sites (e.g., on a switched voice or on a data network)

Answer: D

QUESTION: 51

A small city has CallPilot Rls. 5.0 on their telephone system. City residents speak two different languages, and the city wants their citizens to speak with someone in the language of their choice. Using Application Builder, which application will satisfy this request?

- A. Bilingual
- B. Dial-thru
- C. Announcement
- D. Automated Attendant

Answer: D

QUESTION: 52

A customer has a multi-site CallPilot Rls. 5.0 network. There are many users at each site, and they are concerned about the security and integrity of their system. They have requested that all traffic between servers be authenticated. Which two methods are supported? (Choose two.)

- A. SSL connection
- B. SMTP user id and password
- C. SMTP challenge and response
- D. Voice Profile for Internet Mail (VPIM) networking

Answer: A, B

QUESTION: 53

A multi-site CallPilot network is being installed. There will be multiple servers located at each site. The network database configuration for the local site must be defined. Which two types of configuration information are required? (Choose two.)

- A. the names of the remote sites
- B. the local prime switch location
- C. the name of the system administrator
- D. the local messaging network configuration

Answer: B, D

QUESTION: 54

Your customer plans to install a new CallPilot Rls. 5.0 system (1005r server) on their multi-site Private Branch Exchange (PBX) network. They have Microsoft Office XP installed on the client desktops. They want to use a CallPilot tool that will allow users to send CallPilot messages using the voice and fax number fields directly from Microsoft Outlook Contacts both to CallPilot and non-CallPilot users. Which application provides this functionality?

- A. My CallPilot
- B. CallPilot Reporter
- C. Desktop Messaging
- D. Lotus Notes or Microsoft Outlook

Answer: C

QUESTION: 55

Click the calculator button.

A customer plans to install three new CallPilot Rls. 5.0 systems into their multi-site Private Branch Exchange (PBX) network. They require ten voice channels, five fax channels and five speech recognition channels to support the proposed CallPilot 5.0 systems. Which is the minimum required/supported hardware platform and number of Media Processing Units (MPUs) that will meet their needs?

****EXHIBIT MISSING****

- A. the 703t and 40 MPUs
- B. the 201i and 20 MPUs
- C. the 600r and 40 MPUs
- D. the 1005rp and 96 MPUs

Answer: C

QUESTION: 56

A customer plans to install multiple CallPilot Rls. 5.0 servers into their Private Branch Exchange (PBX) network. Their main concern is the security of the proposed system. Which security measures should you recommend to the customer to increase their CallPilot system security?

- A. Provide SNMP traps for network monitoring.
- B. Maintain CallPilot with automatic updates from third party sources.
- C. Attach tape drives to all CallPilot servers and perform regular backups.
- D. Treat CallPilot servers as closed systems; connect the CallPilot server inside the LAN firewall.

Answer: D

QUESTION: 57

Click the Calculator button.

A legal services company headquartered in New York City (site A) is opening two new offices in San Francisco (site B) and Los Angeles (site C). Given the following information:

- 1) Site A has a Communication Server (CS) 1000M MG system with a CallPilot Rls. 5.0 system (703t server).
- 2) The 703t server has a capacity of 96 Media Processing Units (MPUs).
- 3) They want to install a CS 1000M SG system at sites B and C and provide CallPilot capabilities at these locations.
- 4) Currently, site A is using 8 voice channels, 10 fax channels, and 8 speech recognition channels.
- 5) They expect that within a year the channel requirements for site B will be about 80% of site A's current capacity and site C will be about 90% of site A's current capacity.

Which solution should you recommend that will comply with the server capacity requirements for the CallPilot Rls. 5.0 system?

****EXHIBIT MISSING****

- A. Use 600r CallPilot servers at all sites.
- B. Create a NMS for all sites with the 703t CallPilot server at site A.
- C. Create a NMS for sites A and B, and connect it to a new 600r server at site C.
- D. Create a NMS for sites B and C (a 600r server at either site), and connect it to site A.

Answer: A

QUESTION: 58

A hospital wants to provide voice mailboxes to every nurse and doctor. However, most of these workers share a common Directory Number (DN) with many co-workers, since they move in and out of rooms throughout the day. What is the maximum number of mailboxes that can be associated with a single DN?

- A. 7
- B. 8
- C. 9
- D. 10

Answer: C

QUESTION: 59

CallPilot uses Multimedia Processing Units (MPU) as an engineering guide to support three types of channels. A customer is planning for 24 voice channels, two fax channels and four speech recognition channels. Which two statements are true? (Choose two.)

- A. You need four MPUs for fax channels.
- B. You need 16 MPUs for speech recognition channels.
- C. You need eight MPUs for speech recognition channels.
- D. You need the Multimedia Processing Board (MPB), which provides 16 MPUs.

Answer: A, B

QUESTION: 60

Security across the data network is very important to prevent hackers from gaining access to potentially critical voice messages. Nortel has enhanced the SSL support across the data network by providing the option of Require SSL sessions for certain data transfers. Which protocol traffic can be required to transmit with SSL encryption?

- A. DNS, SMTP
- B. IMAP, LDAP, DNS
- C. IMAP, DNS, SMTP
- D. IMAP, LDAP, SMTP

Answer: D
