for user registration to occur.

**Answer:** B

**QUESTION:** 76

What file contains the configuration information for multiple LDAP servers?

- A. wim-ldap-fed.xml
- B. wimconfig.xml
- C. wimconfig.xsd
- D. wim-policy.xml

**Answer:** B

**QUESTION:** 77

Which one of the following tasks is not required when configuring a property extension database in a single-server environment?

- A. Run the ConfigEngine.bat wp-la-install-ear -DWasPassword=password.
- B. Run ConfigEngine.bat wp-prep-vmm-db-secured-environment -DWasPassword=password.
- C. Set the data source parameters in wp\_add\_LA.properties.
- D. Set the DbDriver and DbLibrary parameters using wkplc\_dbtype.properties.

**Answer:** B

**QUESTION:** 78

What are two of the considerations Todd should take when planning for SSO between the IBM WebSphere Portal server and the IBM Lotus Domino server?

- A. All servers participating in single sign-on must be in the same Internet domain.
- B. To enable single sign-on, Todd must enable the IBM LTPA capabilities included in both IBM WebSphere Application Server and the Lotus Domino server.
- C. No additional configuration is needed if WebSphere Portal server is configured for multiple realms.
- D. To enable single sign-on across multiple Lotus Domino domains, regenerate the WebSphere LTPA token for each of the Lotus Domino domains.

**Answer:** A, B

**QUESTION:** 79

All of the following statements are true regarding external authorization, except?

- A. Private pages cannot be externalized.
- B. When administrators use the Resource Permissions portlet to externalize or internalize access control for a resource, access control for all of its public child resources moves with it.
- C. When administrators use the XML configuration interface (xmlaccess) to externalize or internalize access control for a resource, access control for all of its public child resources moves with it.
- D. If a user inherits access to a resource from a parent resource, the user will lose the inherited access when the resource is externalized.

**Answer:** C

**QUESTION:** 80

Which of the following statements about setting wires on an IBMWebSphere Portal page is correct?

- A. A wire can only be created from one portlet to another portlet on the same page.
- B. A page can have source and target portlets wires configured automatically.
- C. Wires can be created between a source JSR 168 portlet and a target legacy IBM API portlet.
- D. Wires can be either public (available to all users) or private (available to a single user).

**Answer:** D

**QUESTION:** 81

Choose the two items that correctly describe Cooperative Portlets.

- A. Cooperative portlets communicate by using properties that are produced and consumed by portlet actions.
- B. An administrator can use cooperative portlet support with either IBM, JSR 168, or JSR 286 portlets.
- C. JSR 286 portlets require an additional WSDL deployment descriptor which defines portlet actions.

D. Cooperative portlets represent an IBM-specific API for publish/subscribe communication between portlets.

**Answer:** A, D

**QUESTION:** 82

When files are copied to the IBM WebSphere Portal server via the WebDAV interface, where are the files permanently stored?

- A. WebSphere Portal JCR database
- B. WebDAV resource provider
- C. Deployment Manager
- D. wp\_profile on the file system

**Answer:** A

**QUESTION:** 83

IBM WebSphere Portal 8.0 Personalization sends published rules across HTTP to a servlet which resides on each personalization server. Which of the following statements is not a supported configuration?

- A. Host and Target Systems in a clustered environment
- B. Host and Target Systems on IPv6 protocol
- C. Host and Target Systems connected to different LDAP's
- D. Host and Target Systems on different network segments (VLAN)

**Answer:** C

**QUESTION:** 84

Cooper is trying to configure a search collection for a portal in a clustered environment. Where should he put the search collection when the Search server is a separate server.

- A. The search collection should be copied on each IBM WebSphere Portal node.
- B. The search collection should be setup on the search server.
- C. The search collection resides in the database in version 8.0.
- D. The search collection cannot be located on a shared file system.

**Answer:** B

**QUESTION:** 85

When using the branding capabilities of IBM WebSphere Portal, what best defines Themes optimization?

- A. Themes optimization requires a monolithic design to achieve the flexibility that allows administrators to achieve better performance.
- B. Theme optimization uses modules and profiles to achieve the flexibility that allows administrators to achieve better performance.
- C. Theme optimization uses modules and monolithic design to achieve the flexibility that allows administrators to achieve better performance.
- D. Theme optimization uses CSS to achieve the flexibility that allows administrators to achieve better performance.

**Answer:** B

**QUESTION:** 86

What mechanism can be used to analyze the data for user behavior in IBM WebSphere Portal?

- A. The collected data can be sent to Active Site Analytics service for analysis.
- B. The data can be viewed through the Analysis portlet in the WebSphere Portal administrative console.
- C. The data can be viewed and analyzed through the Analysis portlet in the WebSphere Portal administrative console.
- D. The collected data can be viewed using the Analysis servlet in the IBM WebSphere Integrated Solutions console

**Answer:** A

**QUESTION:** 87

Which of the following options is true of VMware technology with IBM WebSphere Portal 8.0?

- A. VMware can be used to mass-replicate identical operating systems installed and configured with WebSphere Portal.
- B. VMware can be replicated with WebSphere Portal with multiple profiles.
- C. WebSphere Portal cloning is not supported with VMware.

D. VMware cannot be used to mass-replicate identical images because WebSphere Portal is tied to the host name.

**Answer:** A
