IBM Cognos 10 BI Data Warehouse Developer

<http://killexams.com/pass4sure/exam-detail/C2020-625>

- A. User-defined folders cannot be exported.
- B. During importing, duplicate components are automatically renamed.
- C. User-defined folders cannot be imported.
- D. During importing, dependent components are automatically selected.

Answer: D

QUESTION: 75

To reduce memory usage, what should be done when setting up dimension breaking for a fact build?

- A. Ensure that each data source is sorted by the same set of dimensions, in the same sequence.
- B. Specify at least one aggregate rule for each dimension element for which breaking is enabled.
- C. Disable the hash table and page pool for the fact build.
- D. Disable late arriving facts processing for the fact build.

Answer: A

QUESTION: 76

When executed, what will the following command line string do?"c:\program files\cognos\c8\bin\rundsjob.exe" -P "ODBC" "DSN=DS_Advanced;DBMS=(other)" "Inventory_Fact_Data" - VTRACE_VALUES=PROGRESS,DETAIL,INTERNAL,SQL,EXECUTEDSQL,USER,VARIA BLE

- A. Execute a fact build called Inventory_Fact_Data.
- B. Add tables (such as INTERNAL) to the Inventory_Fact_Data database.
- C. Execute a JobStream called Inventory_Fact_Data.
- D. Create a database called Inventory_Fact_Data and add a connection to it.

Answer: C

QUESTION: 77

A DataStream includes two different data sources: "Golf Equipment" and "Other Equipment." For each incoming row, the developer wants to add a value that indicates the

data source that the row comes from. What should the developer do?

- A. Create a static member for each data source in the underlying hierarchy.
- B. Add a literal to each data source that references the data source name.
- C. Specify the source identity property for each data source in the DataStream.
- D. Add a derivation to the transformation model to create a new column.

Answer: B

QUESTION: 78

How can a developer nest a JobStream within another JobStream?

- A. Execute the first JobStream from the command line, and reference the second JobStream in the command.
- B. Add a procedure node to the JobStream.
- C. Execute the first JobStream using the Data Movement Service, and include the second JobStream in the resulting task.
- D. Add a JobStream node to the JobStream.

Answer: D

QUESTION: 79

A developer wants to ensure that each incoming row of fact data has a corresponding location code from a dimension table. What should the developer create?

- A. Lookup
- B. Dimensional determinant
- C. Member determinant
- D. Identifier

Answer: A

QUESTION: 80

When creating dimensions, what is commonly used to track historical changes?

- A. Level filters

- B. Surrogate keys
- C. Output filters
- D. Derived dimensions

Answer: B

QUESTION: 81

A developer has added a data source connection to a Data Manager catalog. This connection points to a relational database. The developer wants to view the contents of this database, such as the number of tables that it contains. What tool could the administrator use?

- A. SQLTerm
- B. SQLTXT Designer
- C. ODBC Administrator
- D. Reference Explorer

Answer: A

QUESTION: 82

Several conformed dimensions have been defined and must now be delivered to the data warehouse. Which is the best way to do this?

- A. Deliver the dimension tables through dimension builds.
- B. Run the necessary CREATE TABLE statements in SQLTXT.
- C. Deliver the dimension tables as part of a metadata collection.
- D. Create a metadata dimension and add it to a metadata star.

Answer: A

QUESTION: 83

A dimension table contains the following data:

RepSurKey	RepKey	Name	Office	EffDate	CurrInd
11111	00128	Mary Smith	Dallas	01/01/2005	N
11112	00128	Mary Smith	Houston	03/03/2008	Y

The incoming fact data is as follows:

RepKey	OrderDate	CustKey
00128	01/01/2006	12345
00128	02/01/2006	12345
00128	04/01/2008	12345
00128	02/12/2008	12345

If late arriving fact processing is enabled, what will be the value of the surrogate key assigned to the last row of fact data?

- A. 11110
- B. 11111
- C. 11112
- D. 11113

Answer: B

QUESTION: 84

Which of the following is an advantage of using conformed dimensions in a data warehouse?

- A. Conformed dimensions do not require the use of surrogate keys.
- B. Conformed dimensions enable users to drill from one area of their business to another.
- C. Conformed dimensions enable database views to be reused across the data warehouse.
- D. Conformed dimensions do not require the use of lookups.

Answer: B
