### Question: 105

Juanes needs to import some data from a custom application not using a standard database engine, which is being migrated to a Lotus Notes/Domino application.

How can he accomplish this task?

- A. Export the data to XML on the old application and import it using XMLT.**
- B. Use Lotus Enterprise Integrator.**
- C. Import data using one of the built-in collection services like DECS or connectors.**
- D. Export the data from the old application to one or more ASCII files and import them by using LotusScript file access methods.**

Answer: D

### Question: 106

Winnie is enhancing the interface on the Corporate Phone Book Web application. Ted, the graphics designer who is providing Winnie with the images for her Domino application, as suggested that she use image resource sets.

What is a feature that Winnie can incorporate by using image resource sets?

- A. A horizontal image set can be used to add effects when a user hovers the mouse over an image. For example, the normal image could be replaced with an image with different coloring when the mouse hovers over it.**
- B. A vertical image set can be used to incorporate effects using the onmouseover, onmouseout, and onclick events of an image on an XPage.**
- C. A vertical image set can be used to incorporate effects using the Normal, Mouse-over, Selected, and Mouse-down image states of a Domino Web page image.**
- D. A horizontal image set can be used to add effects when a user hovers the mouse over an image. For example, the normal image could be replaced with a larger image when the mouse hovers over it.**

Answer: A

### Question: 107

Sonia has been asked to rewrite her company's "Careers" Domino Web site using XPages. One of the benefits expected from the new development is better response time for the users.

What is one reason why XPages may offer better performance versus earlier Domino Web sites?

- A. XPages avoid formula language, thereby saving the time incurred by the formula parser on the server.**
- B. XPages are based on JSPs, which are faster than Domino HTML rendering.**
- C. The custom controls that ship with XPages provide optimized widgets that may perform better than those developers could produce on their own.**
- D. XPages are AJAX-enabled, which can offer response time improvements due to partial page refreshes.**

Answer: D

### Question: 108

Adele would like to include a style sheet in every page of her application.

What should she do to accomplish this?

- A. Create a theme and define the style resource within the theme.
- B. Create a style resource and reference it in each design element.
- C. Create a theme defining the style resource and turn on the Enable Enhanced HTML Application options in the application properties.
- D. Use the Enable Enhanced HTML Application option in the application properties, and select her style sheet as the Default Style Sheet Application property.

Answer: C

### Question: 109

Monique's laptop was stolen. Monique had locally encrypted the databases on her machine using medium encryption. Which one of the following can unauthorized users do?

- A. Compact the databases
- B. Nothing
- C. Read copies of the databases made through the operating system
- D. Use their user ids to access local databases on Monique's workstation

Answer: B

### Question: 110

When enabling his XPages application for mobile access, which best describes the options Enrique should consider?

- A. XPages can be viewed without any additional changes on an iPhone or other iOS device.
- B. It might be appropriate to include only a subset of functionality because of the different screen size.
- C. The screen size means different navigation might be required.
- D. All of the above.

Answer: D

### Question: 111

Barney imports a WSDL file into a LotusScript script library, which generates code to call the Web service methods defined by the WSDL file.

Where can he use this script library?

- A. Anywhere that LotusScript can be used
- B. Only in agents
- C. Only in agents and form or view actions
- D. Only in agents that run on the server

Answer: A

### Question: 112

Nancy is creating a Web application and she needs anonymous users to be able to read content and create certain documents. What does Nancy need to do?

- A. Nancy needs to create an Anonymous entry to the ACL with access set to Author. Then, using @Formula she needs to validate if a document is being created by an Anonymous user.
- B. Nancy needs to create an Anonymous entry to the ACL with access set to reader and the option "Write public documents". She also needs to make the forms Available to Public Access users.
- C. Anonymous must be set to Author in the ACL and forms must be blocked to Anonymous users.
- D. Anonymous users cannot create documents if the ACL is set to Reader.

Answer: B

### Question: 113

Joy wants to implement single sign-on for her Lotus Domino Web applications.

What does she need to do?

- A. Ensure that all servers are using the same certificate authority.
- B. Enable "use Single Sign-on" in the database properties.
- C. Encode the Single Sign-On form in each database.
- D. Update the "Session authentication" field in the server's configuration document.

Answer: D
