# HP0-760

*NonStop Kernel Advanced (Level 2)*

<http://killexams.com/pass4sure/exam-detail/HP0-760>

**QUESTION 135**

What does the access list for an adapter show?

- A. number of processors that can access the adapter
- B. cabinet number where the adapter can be accessed
- C. number of devices that can access the adapter
- D. processor numbers that can access the adapter

**Answer: D**

**QUESTION 136**

A CRC character is present in each ServerNet packet. What is the meaning of the acronym CRC?

- A. certified reliability check
- B. circuit response code
- C. cycle response character
- D. cyclic redundancy check

**Answer: D**

**QUESTION 137**

Which system facility allows you to scale an application beyond 16 processors?

- A. NonStop TM/MP
- B. Expand
- C. RDF
- D. NonStop TS/MP

**Answer: B**

**QUESTION 138**

NonStop TUXEDO can be described as

- A. an open transaction processing monitor
- B. the Linux operating system running on a NonStop Himalaya system
- C. the Tru UNIX Environment Distributed Option
- D. an OSS command execution wrapper

**Answer: A**

**QUESTION 139**

What is the best explanation for the following Expand events?

```
\ODS3 02/09/00 10:36:45 AM CPU-Number 4 TANDEM.OMF.D43 CPU Down 103  
ODS3 02/09/00 10:36:47 AM LdevName \ODS3.$ODS4A TANDEM.EXPAND.G06
```

net-line-not-ready 45

\ODS3 02/09/00 10:36:47 AM LdevName \ODS3.\$ODS4A TANDEM.EXPAND.G06

net-line-ready 44

- A. Network line went down and was started by an operator.
- B. Processor failure caused the Expand line handler backup to take over.
- C. One Expand line was taken down and another was started.
- D. Normal periodic Expand re-synchronization occurred.

**Answer:** B

**QUESTION 140**

Which disk volume or volumes on a NonStop Himalaya system CANNOT contain NonStop TM/MP audited files?

- A. audit-trail volumes
- B. unmirrored volumes
- C. data volumes
- D. \$SYSTEM

**Answer:** A

**QUESTION 141**

Which of the following is the NetBatch-Plus command interpreter?

- A. NETBATCH
- B. BATCHCOM
- C. BATCHCAL
- D. NBEXEC

**Answer:** B

**QUESTION 142**

You are upgrading a mirrored disk volume to one that has a larger capacity. Which of the following applies?

- A. The disk drive must not have opened SQL tables.
- B. The data on that named disk volume remains continually available.
- C. The opened files on the disk drive must be TMF protected.
- D. All files on the disk must be closed.

**Answer:** B

**QUESTION 143**

Which approved method is used to remove old Guided Replacement Toolkit (GRT) log files?

- A. ZSWEEP
- B. PURGE
- C. FUP
- D. DELETE

**Answer:** A

**QUESTION 144**

Which NonStop TM/MP component contains records of online dumps, audit dumps, and the media on which they reside?

- A. MASTER AUDIT TRAIL
- B. TMF CATALOG
- C. ZTMFCONF
- D. DSM Tape Catalog

**Answer:** B

**QUESTION 145**

Which of the following is NOT a benefit of file partitioning?

- A. providing for processor and disk volume load balancing
- B. increasing the total number of alternate keys
- C. increasing the total file capacity
- D. providing distributed, multinode file placement

**Answer:** B

**QUESTION 146**

What is the purpose of the Remote Database Facility (RDF)?

- A. maintains a copy of a database on one or more remote systems for recovery purposes
- B. accesses database images on one or more remote systems transparently for homogeneous applications
- C. archives database configuration information for remote systems on a centralized node
- D. synchronizes versions of archived data for registered application domains

**Answer:** A

**QUESTION 147**

OSS disk files can be of what type?

- A. relative
- B. unstructured
- C. key-sequenced

D. entry-sequenced

**Answer:** B

**QUESTION 148**

When a failed processor is reloaded, a standard Pathway system (without extended management capability) will typically

- A. create the NUMSTATIC server processes that have been configured to run in the reloaded processor
- B. wait for operator confirmation before making the new processor available for server creation
- C. recreate all the server processors that were running in this processor prior to processor failure
- D. create server processes in the new processor as demand requires

**Answer:** D
