# HP0-919

*HP Data Protector Software Application Integration-UNIX*

<http://killexams.com/pass4sure/exam-detail/HP0-919>

- C. application disk agents (ADAs)
- D. application programming interfaces (APIs)

**Answer:** D

**QUESTION:** 63

What provides you with information about Oracle database backups? (Select two.)

- A. RMAN catalog database
- B. RMAN backup database
- C. RMAN internal database
- D. HP Data Protector Software internal database
- E. HP Data Protector Software catalog database

**Answer:** A, D

**QUESTION:** 64

Why do you duplicate a database with the same database identifier as the production (primary) database?

- A. testing
- B. data mining
- C. standby database creation
- D. LAN-free backup scenario setup

**Answer:** C

**QUESTION:** 65

Versions 4.5 and higher of the SAP R/3 backup utilities allow Oracle data files to be backed up directly using the Oracle Recovery Manager. What is the major advantage of this?

- A. distributed full backup support, reducing backup time and enhancing data reliability
- B. virtual incremental backup support, reducing restore time and enhancing data reliability
- C. incremental backup support, significantly reducing backup time and amount of backed up data
- D. synthetic full backup support, significantly reducing restore time and number of restore operations

**Answer:** C

**QUESTION:** 66

You want to backup a two-node Oracle Data Guard environment with three database instances per host. How many integration licenses are needed?

- A. 1
- B. 2
- C. 3
- D. 6

**Answer:** B

**QUESTION:** 67

Which conditions must be met when you duplicate a database with the HP Data Protector Software Oracle integration? (Select two.)

- A. Net service name for the auxiliary instance must be configured.
- B. The entire primary database, together with the archived log files, must be backed up.
- C. Duplicating a database on the same system that the target database resides is not supported.
- D. Archive logs that have not been backed up to tape since the last full backup, are not required for duplication.
- E. To prepare for database duplication, you must first create an auxiliary instance and start it in Mount mode.

**Answer:** A, B

**QUESTION:** 68

You duplicate a database (not for standby) on the same system where the production database resides. Which statement is correct?

- A. You can use the duplicate to create a standby database on a remote system.
- B. A restore must be done to an Oracle home directory different from that of the production database.
- C. If the same database ID is assigned to the production database and the duplicate, you can use the duplicate for testing purposes.
- D. You cannot use the same database name for the production and duplicate databases if both databases reside in the same Oracle home directory.

**Answer:** D

**QUESTION:** 69

David uses a Virtual Library System (VLS) for backing up his Oracle archive logs and file server data. He uses a capacity based license for one terabyte. This limit is exceeded during

backup. What does HP Data Protector Software do?

- A. generates a minor error and reports it
- B. generates a major error and backup stops immediately
- C. generates a critical error and notifies the HP license team
- D. generates a minor error and the next backup job will not run

**Answer:** A

**QUESTION:** 70

What is the online backup licensing requirement for a new HP Data Protector Software customer running Oracle databases on UNIX servers, each with multiple database instances?

- A. one online extension license for UNIX per cell
- B. one online extension license for UNIX per instance
- C. one online extension license for UNIX per UNIX server
- D. one online extension license for UNIX per instance if all instances are backed up at the same time

**Answer:** C

**QUESTION:** 71

What are SSH authentication features in HP Data Protector Software? (Select three.)

- A. Authentication happens through public-private key pair.
- B. No username and password pop-up window appear.
- C. A list of known hosts on the installation server is not required.
- D. Encrypted installation packages are transmitted over the network.
- E. Clients can use SSH1 and server can use SSH2 for authentication.
- F. HP-UX systems use an encrypted communication with Windows systems and vice versa.

**Answer:** A, B, D

**QUESTION:** 72

You are installing HP Data Protector Software version 6.0 in an HP-UX 11i environment. Which tool eliminates the need to manually supply passphrases to ssh programs?

- A. keygen
- B. keychain
- C. ssh-agent

D. ssh\_config

**Answer:** B

**QUESTION:** 73

You want to use a protected remote installation variant for HP Data Protector Software clients. In which file must OpenSSH be enabled?

- A. global
- B. .profile
- C. .omnirc
- D. omnissh.sh

**Answer:** C
