**QUESTION: 45**

What technology has HP developed to help improve energy efficiency for HP Workstations ?

- A. low wattage power supply
- B. HP Wattsaver
- C. sleep mode energy shut down
- D. power conservation PSU

**Answer: B**

**QUESTION: 46**

How should you describe Intel® Turbo Boost technology used in HP Workstations to your customer?

- A. It speeds up the CPU performance while reducing the per cycle power consumption.
- B. It dynamically uses available power and thermal headroom to boost CPU frequency.
- C. This technology effectively manages the wattage consumed by each of the CPUs.
- D. It connects memory directly to the processor providing faster access to memory.

**Answer: D**

**QUESTION: 47**

Which advantage does eSATA provide that SATA does not?

- A. It compresses data to expand the volume size.
- B. It is a newer and more efficient disk technology.
- C. It enables the configuration of external SATA drives.
- D. It supports shared storage across multiple workstations.

**Answer: C**

**QUESTION: 48**

Which statement describes the Intel® QuickPath Architecture on HP Workstations?

- A. It enables the system to assign standard memory as cache to each CPU core.
- B. It is a direct connection between the CPU and disk.
- C. It is an architecture that helps increase the CPU cycles and improve performance.
- D. It is a high-speed point-to-point interconnect between CPU, memory, and I/O.

**Answer: B**

**QUESTION: 49**

Which HP Workstation feature has had a positive impact on the work environment?

- A. addition of liquid cooling
- B. 85% efficient power supply
- C. improved, superior acoustics
- D. cable-less engineering

**Answer: A**

**QUESTION: 50**

Which feature should you mention to a customer when discussing the ability to fine tune and optimize their workstation?

- A. multiple display support
- B. disk capacity and RAID
- C. HP Performance Advisor
- D. HP Application Eco-system

**Answer: A**
